

26. Hotend fan assembly (version A)

 **The fan has two sides**, one has a sticker. Make sure, this side is facing inside the extruder.

 First, create a loop on the cable. Make sure the black protective wrap is close to the edge of the fan. See the picture.

 Place the fan on the extruder and proceed in the following way:

 Start by placing the fan's cable in the upper channel

 Slide the fan close to the X-carriage and **GENTLY PUSH** the cable in using an Allen key. Before you push the fan all the way to the left, place the cable in the X-carriage channel.

 **FINAL CHECK!** The fan is oriented with the cable facing up, then the cable goes through the upper channel all the way to the X-carriage. In the X-carriage don't forget to use both channels. Make sure the **CABLE ISN'T PINCHED** along the way!
