

6. Y-axis: front and rear plate preparation

For the following steps, please prepare:

-  Front plate (1x)
 -  Rear plate (1x)
 -  There is a sticker with serial number on the rear plate. Keep it in mind, we use it as a guide to orient the part later on. **Do not remove the sticker!**
 -  M5x16r screw (16x)
 -  PSU holders M3nE (2x)
-  The **latest kit units contain M3nEs nuts**. The M3nEs nut is slightly different, it has a sheet metal spring. However, the installation procedure is the same.
