Upgrade MKS 3.5 Wifi don't work

Hi,

I upgraded my MK3s+ to MK3.5, all is great but when I want to Setup Wi-Fi Module, I get "Firmware flashing failed !" error. I mention that the Ethernet is working.

The ESP-01S is in place and I try several times to update it. I have FW Version 6.0.0+14794, bootloader version 2.3.4

Help will be much appreciated !

Regards...

RE: Upgrade MKS 3.5 Wifi don't work

Turn off WPA3 Auth on wireless router/access point.
There is a known issue with WPA3 and the latest 6.0.0 firmware.

 [BFW-5393] [BUG] 6.0.0 - Wifi doesn't work in WPA3/WPA2 Transition mode #3864

RE: Upgrade MKS 3.5 Wifi don't work

Just completed my upgrade after a year of it sitting in the box, I have the same issue. The printer first failed to flash the wifi. I then updated the printer to the latest firmware, now it says wifi module not detected. Is there a solution to this issue?
