43. Fan-shroud assembly (both fan versions)   ⌄
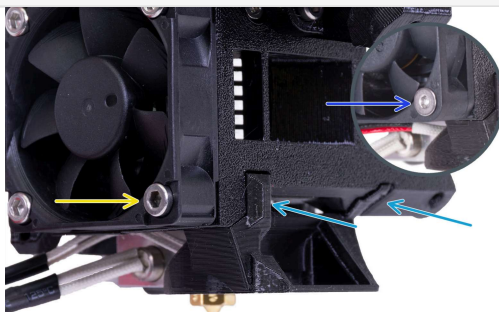

- 🟢 Insert M3nS nut in the Fan-shroud, all the way in.

- ⓘ Ensure correct alignment using the Allen key.

- 🟣 See the protrusion on the Fan-shroud and the groove in the extruder.

- 🔵 Slide the Fan-shroud into the extruder. Make sure that both protrusions on the Fan-shroud fit in the grooves on the extruder (see the picture).

- ⬛ **To mount the fan-shroud, select the appropriate version according to the type of hotend fan:**

  - 🟡 **Version A:** Secure it using the M3x20 screw. Don't overtighten the screw, you can break the plastic casing. Also make sure the fan can rotate freely.

  - 🔵 **Version B:** Secure it using the M3x22b screw. Don't overtighten the screw, you can break the plastic casing. Also make sure the fan can rotate freely.
